DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-5, 8, 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Lin (US. PUB. NO. 2003/0002900).

As to claims 1, 8, 16, Lin teaches a folding keyboard (Figs. 2-6) is divided into a fixed key module 14 (a first key-base section) and a mobile key module 15 (a second key-base section), the fixed key module 14 and the mobile key module 15 are pivotally joined together by using the links 16. Fig. 17 of Lin teaches the fixed key module 14 is received and fixed in the receiving space 24 of a first cover plate 21 (first keyboard-base section), the mobile key module 15 is received and movably disposed in the receiving space 25 of a second cover plate 22 (this corresponds to the second key-base section is separably provided on the second keyboard-base section). Fig. 17 of Lin also shows that the first cover plate 21 and the second cover plate are pivotally joined together through the pivotal plate 23 and the two pivots 26 and 27 (see sections [0037] and [0038]).

As to claims 2-5, Figs. 3-6 of Lin teaches a hinge for pivotally connecting the two key modules.

Application/Control Number: 09/898,692

Art Unit: 2674

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 6, 7, 9-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin in view of Olodort et al (US. PAT. NO. 6,331,850 hereinafter Olodort).

Lin differs from the claims in not having a movably hinge and a groove in the second keyboard-base section to contain the movably hinge. However, Figs. 20, 22, 23 of Olodort teaches a collapsible keyboard having a movably hinge for connect two key sections, the key base having a groove to contain the movably hinge. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the keyboard of Lin to have a movably hinge and a groove in the second keyboard-base section to contain the movably hinge as taught by Olodort to provide for a more compact profile when the assembly is collapsed.

Response to Arguments

5. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

Olodort et al (US. PAT. NO. 6,734,809) teaches a foldable keyboard.
